Subject: RE: Former Williams Air Force Base, Site ST012

Angeles, Tina and Loren,

I received your letter dated July 28, 2016 invoking informal dispute over remedy implementation at Former Williams AFB Site ST012, Liquid Fuels Storage Area.

As indicated in your letter, the Air Force will be sharing newly collected site characterization data prior to the scheduled August 24, 2016 BRAC Cleanup Team meeting in Phoenix. In order to expedite data availability to all parties, the preliminary (not validated) analytical data will be posted to the Williams AFB project SharePoint. Receipt of all preliminary data is expected the week of August 8, 2016. Some of the preliminary analytical data has already been posted. In addition, weekly reports are distributed to the regulatory team with information collected on water level and temperature monitoring, LNAPL monitoring and removal, and soil vapor extraction operations.

I am available to discuss the path forward for the Site on or before the scheduled meeting on August 24, 2016.

V/R
